

Marine Refrigeration and Air Conditioning

Providing the marine industry with reliable, cost effective, energy efficient, environmentally friendly, quality solutions to effectively meet all of your requirements and demands.

Service

A team of 15 fully trained and qualified refrigeration engineers who carry out marine service work throughout the UK and at short notice regularly travel to ports worldwide.

Work undertaken includes:

- Breakdowns and trouble shooting
- Reciprocating & screw compressor overhauls
- R22 conversions
- System & compressor service & repairs
- Leak detection & environmental compliance programmes
- Electronic control system repairs & upgrades

Spares

Everything you are likely to need from the Engine Room to the Bridge and from Cargo refrigeration screw compressors to small cabin refrigerators. Our product range includes but is not limited to:

- New & reconditioned compressors
- Compressor accessories & spares
- System components & spares
- Electrical & electronic components & spares
- Tools & tool kits
- Package equipment & split A/C systems
- Refrigerants, oils, glycols & cleaning chemicals
- Air conditioning components & spares

Projects

A fully qualified in house team that design, install and commission:

- Package A/C Units & Split A/C Systems
- Provision Plants
- Accommodation Air Conditioning Systems
- Major system upgrades, modifications, life extension & efficiency programmes
